SELECTED WORK PORTFOLIO

Clark Gurden

Product Marketing & Global Brand Strategy | Gaming Hardware, AI PCs, Consumer Technology

10+ years at Acer HQ in Taiwan, working upstream with product and business teams to decide what a product stands for, then building the messaging systems that carry that story into web, retail, sales, and global launch execution.

Portfolio v3.0 | August 2026

10+ yrs
Acer global product messaging and positioning

20-30
hardware launches supported annually

Cross-category
technical product sheets
commercial, gaming, AI PCs

3 regions
EMEA, Pan America, and Pan Asia Pacific

Positioning Snapshot

CORE VALUE

I turn complex technical inputs into positioning, value propositions, and message hierarchy, then carry that logic into launch-ready content systems that remain accurate through stakeholder review and regional adaptation.

BEST FIT

Global product marketing, product positioning, launch communications, gaming and AI hardware marketing, product content strategy.

Core Capabilities

- Positioning Strategy
- Technical Translation
- Portfolio Differentiation
- Launch Systems
- Web Architecture
- SEO / GEO
- Retail / eTail
- Cross-Functional Execution
- AI-Assisted Workflows

Selected Work Map

Selected work	Portfolio signal
Predator Atlas 8	New-category positioning, product summary, reviewer guide, Computex 2026 launch messaging
Acer Nitro portfolio	Brand-tier differentiation across handhelds, laptops, desktops, displays, and peripherals
Predator Helios 18 AI + Predator Triton 14 AI	Same technology platform, different buyer motivation and message hierarchy
Predator gaming furniture	Enthusiast positioning across Predator Thronos / Predator Thronos Air, Predator Rift 371, and Predator Gaming Desk
Predator Gaming Technology Hub	End-to-end information architecture, icon-led navigation, copy, and ongoing module ownership
Global launch systems	Master copy, product summaries, product sheets, page architecture, QA, regional handoff

CASE STUDY 1 | HANDHELD GAMING | COMPUTEX 2026

Predator Atlas 8 - Building a New Category Story

WHAT I OWNED

Led global English messaging for the Predator Atlas 8 launch, including the **product summary, reviewer guide, KSP hierarchy, feature framing, and stakeholder-ready copy**, working directly from engineering specifications and brand requirements.

THE HARD PROBLEM

Predator had never entered the handheld category. The story needed to establish a serious performance identity in a new form factor without simply shrinking the laptop message or turning the page into a spec dump.

THE DECISION

Anchor the launch around **Predator-grade performance made portable**, then sequence the story around performance, control, display, and thermal design before secondary usability benefits.

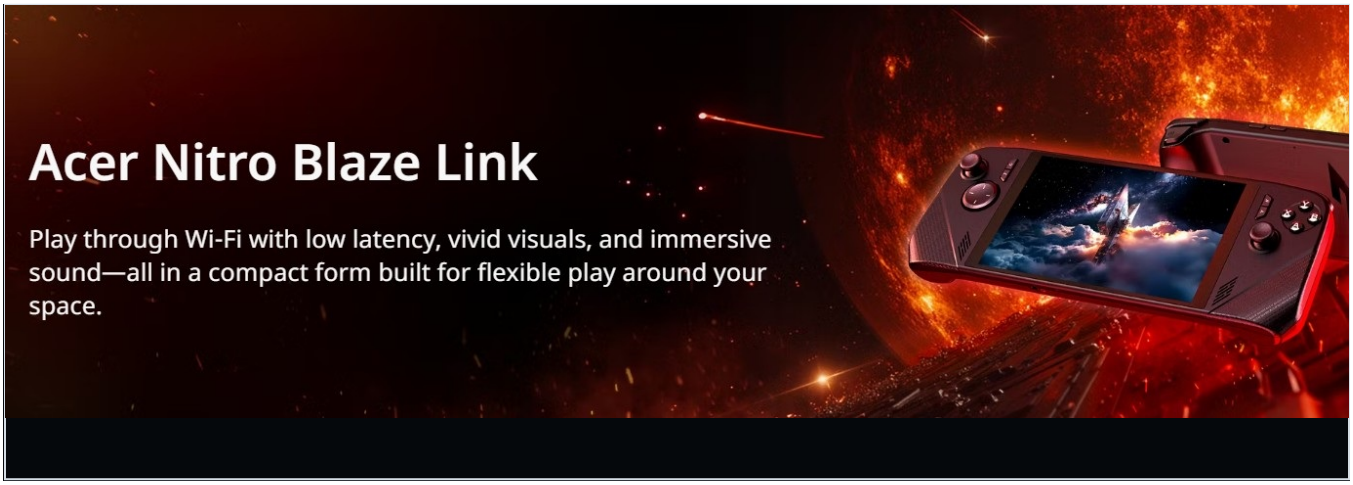

WHAT THIS PROVES

Category-entry positioning, upstream message hierarchy, technical translation, and the ability to create one source of truth for press, stakeholders, and global launch teams.

> **Direct launch documents:** Predator Atlas 8 product summary + reviewer guide, alongside the global master copy and KSP hierarchy.

One Brand Voice Across Different Gaming Buyers

WHAT I OWNED

Across assigned Acer Nitro launches, Clark owned global English messaging within his scope. Acer Nitro Blaze Link and Acer Nitro V 15 show how benefit-led brand logic changed across two form factors in the same season. Contribution varied by launch.

THE HARD PROBLEM

Nitro must feel more accessible than Predator without reading as a compromised or "budget" version of it. The tone, feature hierarchy, and level of technical detail all have to change without losing credibility.

WHAT I BUILT

Used a benefit-first framework: lead with what the hardware lets the player do, then use the spec as proof. That kept Nitro consistent across devices while allowing each product to serve a different job.

REGIONAL CONSISTENCY

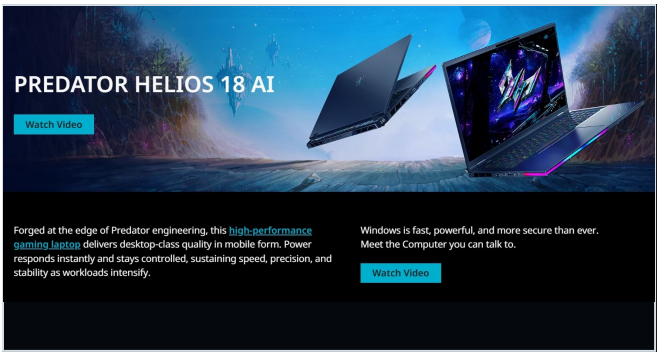

Worked with translation partners when regional teams needed different emphasis, keeping the English source clear enough to travel without flattening the brand into one generic gaming voice.

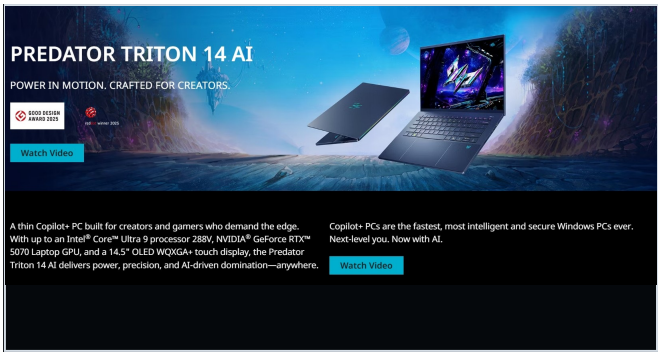

Acer Nitro Blaze Link
Product summary + global master copy + KSP structure + product-page / retail messaging.

Acer Nitro V 15
Global master copy + KSP structure + product-page / retail messaging.

Predator Helios 18 AI + Predator Triton 14 AI

PREDATOR HELIOS 18 AI - FLAGSHIP PERFORMANCE

Within assigned launches: global English master copy, KSP hierarchy, technical-benefit translation, claims/disclaimer language, and messaging review of implemented product-page content.

Message decision: make gaming performance the anchor. AI, thermal design, and display support that claim rather than compete with it.

View live Predator Helios 18 AI page

PREDATOR TRITON 14 AI - PORTABLE PREMIUM

Within assigned launches: global English master copy, KSP hierarchy, technical-benefit translation, claims/disclaimer language, and messaging review of implemented product-page content.

Message decision: turn compact size into a premium choice - portable performance and flexibility - instead of allowing a smaller chassis to imply "less laptop."

View live Predator Triton 14 AI page

WHAT THIS PAIRING PROVES

Positioning is not a reusable paragraph. Two premium AI gaming systems can share many technologies while requiring different message hierarchy, buyer language, and proof points. My role was to decide what each page should lead with before the writing began.

Gaming Portfolio Architecture

Through July 2026, Clark owned global English messaging systems for assigned Predator and Acer Nitro gaming-PC launches. Working from Product Marketing and engineering inputs, he translated approved claims into product-specific KSP hierarchies, copymasters, disclaimer and claims language, and technical-benefit framing. He also reviewed implemented product-page content for messaging accuracy, claim fidelity, and hierarchy. Contribution varied by launch.

The portfolio did not use one reusable message. Predator Helios foregrounded flagship performance; Predator Triton balanced premium performance with portability and creation; Acer Nitro used benefit-led language to make gaming approachable without presenting the brand as compromised.

Portfolio messaging matrix

Family	Audience or portfolio role	Representative product	Clark's exact contribution
Predator Helios	Flagship/high-performance gaming	**Predator Helios 18 AI**	Global English copymaster; KSP hierarchy; claims/disclaimer language; technical-benefit translation; messaging review of implemented page content.
Predator Triton	Portable premium performance for gaming, travel, creation, and flexible use	**Predator Triton 14 AI**	Global English copymaster; KSP hierarchy; claims/disclaimer language; technical-benefit translation; messaging review of implemented page content.
Neo variants (Predator Helios Neo / Predator Triton Neo)	Product-specific extensions of their parent family positioning	**Assigned Predator Helios Neo / Predator Triton Neo launches**	Copymasters and product-specific KSP hierarchies within assigned launches; contribution varied by product.
Predator Orion	Desktop messaging shaped around performance, chassis, cooling, and upgrade story	**Assigned Predator Orion launches**	Approved-proof-point translation; global English copymasters; product-specific KSP hierarchies within assigned launches.
Acer Nitro	Approachable, benefit-led gaming differentiated from Predator	**Acer Nitro 17**	Global English copymaster; KSP hierarchy; claims/disclaimer language; technical-benefit translation within assigned launch scope.
Acer Nitro V	Accessible gaming for play, study, streaming, and everyday multitasking	**Acer Nitro V 15**	Global English copymaster; KSP hierarchy; product-page/retail messaging within assigned launch scope.

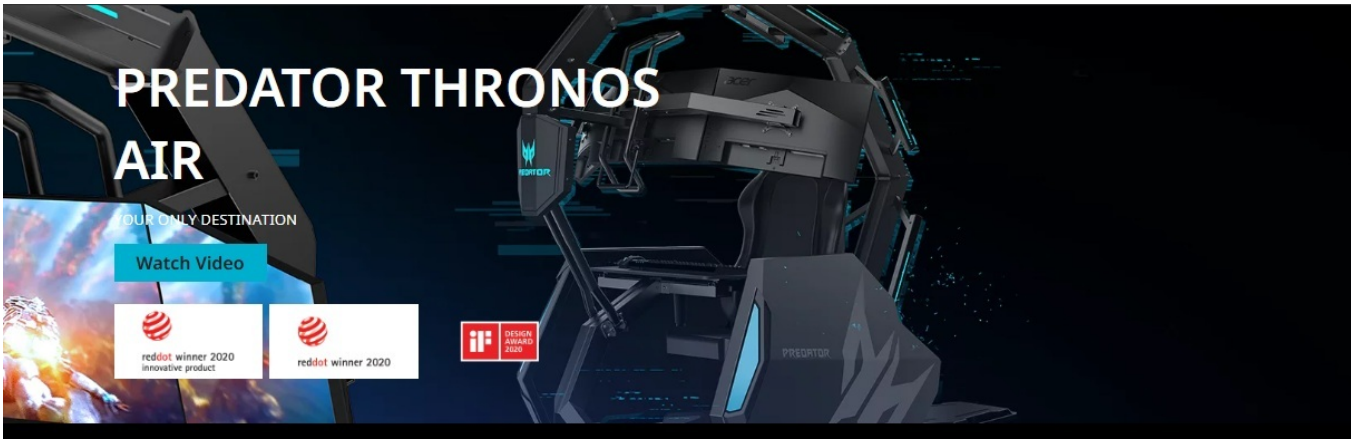

Representative Portfolio Coverage

Representative work; contribution varied by launch.

Gaming laptops Predator Helios 18 AI; Predator Triton 14 AI; Predator Helios Neo / Predator Triton Neo; Acer Nitro V 15	**Gaming desktops** Predator Orion family; Acer Nitro gaming desktops
Handhelds Predator Atlas 8; Acer Nitro Blaze Link	**Displays** Predator gaming displays; Acer Nitro gaming displays
Peripherals & audio gaming keyboards; gaming mice; gaming headsets; Predator Vox	**Ecosystem & furniture** Predator Gaming Technology Hub; Predator Thronos Air; Predator Rift 371; Predator Gaming Desk

CASE STUDY 5 | GAMING FURNITURE + LIFESTYLE HARDWARE

Extending Predator Beyond the PC

PREDATOR THRONOS + PREDATOR THRONOS AIR

Owned global launch copy and KSP hierarchy for Predator's cockpit line, translating display support, comfort, adjustability, integrated accessories, and premium design into an enthusiast-tier experience rather than a feature inventory.

The original Predator Thronos is now historical; Predator Thronos Air remains live.

View Predator Thronos Air

WHY THE STORY CHANGED

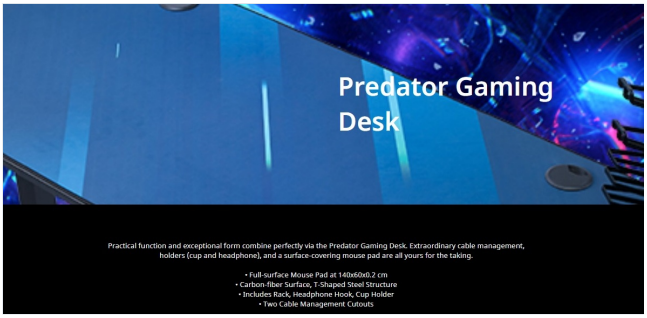

Furniture asks for a different kind of product story from a laptop: physical experience, ergonomics, durability, adjustability, and the complete setup have to feel valuable before the specifications do.

PREDATOR RIFT 371 | GAMING CHAIR

Wrote the consumer-facing copy, turning 4D armrests, recline, cushioning, structural support, and adjustability into a clear comfort-and-control story for extended gaming sessions.

View Predator Rift 371

PREDATOR GAMING DESK

Wrote product messaging around work-surface scale, cable management, accessory storage, durability, and easy assembly - practical setup benefits for an enthusiast gaming environment.

View Predator Gaming Desk

WHAT THIS PROVES

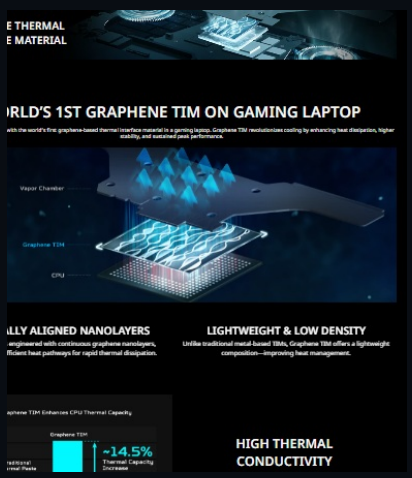

Furniture-category fluency | premium enthusiast positioning | technical-to-consumer translation | feature hierarchy | multi-category gaming ecosystem storytelling

FLAGSHIP CASE | INFORMATION ARCHITECTURE + TECHNICAL STORYTELLING

Predator Gaming Technology Hub

I identified a gap: proprietary Predator technologies were being explained piecemeal across individual product pages, with no central destination showing how the technology ecosystem fit together. I proposed and built that destination, then maintained it as Predator evolved.

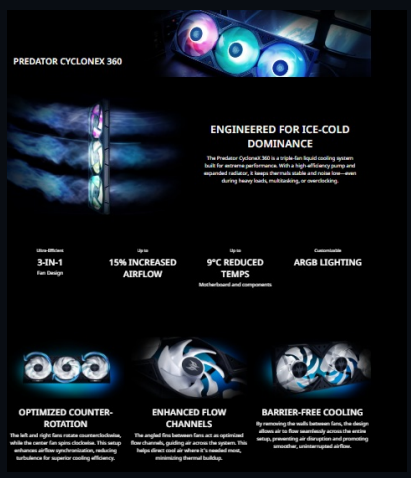

GRAPHENE TIM

Technical explanation, hierarchy, visual/ content requirements, copy, and module placement.

PREDATOR VOX

Extended the same content system from cooling into audio without changing how users navigate the hub.

CYCLONEX 360

Scaled the technology platform into desktop cooling with comparative proof points and product links.

END-TO-END OWNERSHIP

Page layout and structure, information architecture, navigation, the decision to use icon-led navigation, content hierarchy, decisions about what text appeared where, and the English copy itself. I also authored and updated major modules including AeroBlade, Graphene TIM, Predator Vox, MagKey 4.0, and CycloneX 360.

WHY IT MATTERS

This is not just page copy. It is a reusable customer-education platform connecting product pages to deeper technical proof. It demonstrates initiative, IA, UX/content decisions, technical translation, and long-term ownership of an evergreen web asset.

View live Gaming Technology page

OPERATING SYSTEM | HOW THE WORK SCALES

From Technical Input to Global Launch System

Engineering + PM inputs	Positioning + message hierarchy	Global master copy	Web / retail / sales assets	Regional adaptation + QA

PAGE ARCHITECTURE & SEARCH

Co-owned gaming pillar-page structure with the brand team, including intent-based destinations, internal linking, keyword placement, technology-page loops, and FAQ strategy.

SEMrush + monthly ranking review with web operations; traditional search and AI-driven discovery.

LAUNCH DOCUMENTATION

Global master copy, KSP systems, product-page content, enhanced retail/eTail, packaging, and stakeholder materials.

Product summaries: Predator Atlas 8 and Acer Nitro Blaze Link.
Predator Atlas 7: pre-launch product summary prepared before July 2026 for its planned IFA launch.
Reviewer guide: Predator Atlas 8 only.

TECHNICAL PRODUCT SHEETS

Technical product sheets across commercial systems, gaming hardware, and AI PCs supported tenders, partner sales, and regional marketing.

Built a reusable AI-assisted pipeline for spec extraction, grid-matched formatting, document assembly, and QA.

HUMAN-LED, AI-ASSISTED

Use AI for repetitive extraction, scaffolding, variants, and assembly while keeping human control over positioning, claim accuracy, brand voice, legal/technical judgment, and final approval.

Senior judgment should be spent on decisions, not repetitive transcription.

CROSS-FUNCTIONAL EXECUTION

- Product managers and business stakeholders
- Web operations, design, legal, sales, and regional marketing
- Translation and external agency partners
- Launch support across EMEA, Pan America, and Pan Asia Pacific

STRONGEST ROLE FIT

- Global / hardware Product Marketing
- Product positioning and messaging
- Gaming, AI PC, displays, and peripherals
- Web content strategy and launch communications
