PRODUCT & BRAND MARKETING | GAMING HARDWARE, FURNITURE & STREAMING GTM | TAIWAN-TO-GLOBAL

Professional Summary

Senior product and brand marketing professional with **10+ years at Acer HQ** building global English positioning, launch messaging, and content systems for assigned Predator and Acer Nitro gaming-hardware launches through July 2026. Bridged Taiwan engineering and global consumer and gaming audiences. Supported brand consistency and launch execution across **20-30 assigned hardware launches annually**, spanning laptops, desktops, handhelds, monitors, peripherals, audio, connected devices, and gaming furniture (Predator Thronos), with deep craft in GTM strategy, product naming, and lifecycle content from pre-launch through refresh.

Core Strengths

Global Brand Strategy & Positioning: Brand Identity & Voice | Enthusiast-Tier / Premium Positioning | Competitive Benchmarking | Portfolio Differentiation | Product Naming

End-to-End Product Marketing (GTM): Go-to-Market Strategy | Launch Positioning | KSP Architecture | Global Copymasters | Pre-Launch to Refresh Lifecycle | Regional Localization

Content & Creative Development: Global Product Pages | A+ / eTail | Product & Promo Video Scripts | Visual Asset & Photography Review | Product Documentation | Reviewer & Press Materials

Retail, Channel & Partner: Sales Enablement | Partner / Tender Documentation | e-Commerce Content | Packaging | Technical Product Sheets

Data & Discovery: SEMrush | Web-Traffic & Search Data | SEO / GEO | CMS Workflows | AI-Assisted Content Pipelines | QA Systems

Cross-Functional Collaboration: Product & Engineering (Taiwan) | Business Stakeholders | Design | Web Operations | Legal | Sales | Regional Marketing | Agencies

Professional Experience

Head Gaming Copywriter, Global Marketing & Branding | Acer Inc.

Taipei, Taiwan | Jun 2021 - Jul 2026 (Promoted from Gaming Brand Specialist / Creative Copywriter, Apr 2016 - Jun 2021)

Global product and brand marketing role for Predator and Acer Nitro, connecting Taiwan engineering, brand strategy, web, retail, sales, and regional execution across international markets.

- Through July 2026, led global English messaging systems across **20-30 assigned hardware releases annually** for Predator and Acer Nitro, translating approved claims into product-specific KSP hierarchies, copymasters, disclaimer and claims language, and technical-benefit framing.
- Partnered directly with product and engineering teams at Taiwan HQ to translate technical specifications into clear consumer benefits, KSP hierarchies, global copymasters, product pages, packaging, and campaign and video scripts.
- Held distinct Predator and Acer Nitro positioning across assigned launches: Predator Helios foregrounded flagship performance, Predator Triton balanced premium performance with portability and creation, and Acer Nitro used benefit-led language to remain approachable without implying compromise.
- Developed product-specific copymasters and KSP hierarchies across assigned Predator Helios, Predator Triton, Predator Helios Neo / Predator Triton Neo, Predator Orion, Acer Nitro, and Acer Nitro V launches; contribution varied by product, with messaging and proof priorities tailored to each audience and launch.
- Produced **technical product sheets** and related sales, partner, tender, and eTail materials across commercial systems, gaming hardware, and AI PCs, turning dense specifications into commercially usable content for channel, retail, and regional teams.
- Created the **Predator Gaming Technology Hub** end-to-end, from information architecture, navigation, and icon system to copy and recurring technology updates including Predator AeroBlade, Graphene TIM, Predator Vox, Predator MagKey 4.0, and Predator CycloneX 360 cooling and audio features.

- Created product summaries for Predator Atlas 8 and Acer Nitro Blaze Link, created the Predator Atlas 8 reviewer guide, and presented Predator product stories at Acer global press and launch events across multiple years, with selected public appearances linked in the portfolio.
- Used SEMrush and web-traffic and search data to shape keyword-aware page architecture, metadata, FAQs, and content structure for traditional search and AI-driven discovery.

Selected Relevant Work

Predator Gaming Furniture (Predator Thronos, Predator Thronos Air + Gaming Chairs): Owned global launch copy and KSP hierarchy for Predator's enthusiast gaming chair and cockpit lines, working from deep product-level knowledge of the hardware and restructuring page content against competitor benchmarks to sharpen the furniture story and hold premium positioning.

Acer Nitro Blaze Link (streaming-first handheld): Owned product messaging for a streaming-oriented handheld, defining a differentiated story around extending an existing PC gaming and streaming setup rather than replacing it.

Predator Atlas 8 (Computex 2026): Led the global English copymaster, product summary, reviewer guide, and KSP structure for Predator's new Windows handheld category, translating specifications and brand requirements into launch-ready positioning.

Predator Helios 18 AI + Predator Triton 14 AI: Built global English copymasters, product-specific KSP hierarchies, claims and disclaimer language, technical-benefit framing, and messaging review of implemented product-page content within assigned launch scope.

Gaming Peripherals, Audio & Connected Devices: Developed messaging across keyboards, mice, headsets and audio, accessories, and connected-device features, adapting technical benefits for enthusiast buyers, retail formats, and global product pages.

Predator Gaming Technology Hub: Built the page concept and system start to finish, including navigation, modular layout, icon-led category structure, and recurring refreshes. The live hub remains a direct example of 0-to-1 web and content platform ownership.

Product-Line Naming: Co-developed naming for Predator Helios, Predator Triton, Predator Orion, Predator Galea, Predator Aethon, Predator Cestus, and Predator Bifrost, plus Acer Swift and Acer Spin, carrying selected names through director approval and legal clearance.

Education, Tools & Development

Grand Valley State University | B.A. History | 2001 - 2005

Tools: SEMrush | Microsoft 365 | Google Workspace | Global Website / CMS Workflows | Canva | ChatGPT | Claude | Codex / AI Coding Assistants | A+ / eTail Frameworks | Product Documentation

Development (in progress): Google Analytics (GA4) and web-analytics fundamentals, plus Google Ads / search and growth and sentiment analytics concepts, to strengthen data-driven, ROI-aware brand decisions.
